<i>Information and Planning</i>	18
Chart 1. Do you get enough information to take part in planning services for your family member?	20
Chart 2. Is the information you get about services and supports easy to understand?	20
Chart 3. Do staff or the residential agency keep you informed about how your family member is doing?	20
Chart 4. Does the case manager/service coordinator respect your family's choices and opinions?	20
Chart 5. Respondent's future planning needs	21
Chart 6. In the past year, did your family member move out of the family home for the first time?	21
Chart 7. If family member moved out of the home for the first time in the past year, did you have enough choices of service providers to support your family member living outside the family home?	21
Chart 8. Does your family member have a service plan?	21
Chart 9. Does the plan include all the services and supports your family member needs?	22
Chart 10. Does your family member get all of the services listed in the plan?	22
Chart 11. Did you or another family member (besides your family member with a disability) help make the plan?	22
Chart 12. Did your family member help make the plan?	22
Chart 13. Did you discuss how to handle emergencies at your family member's last service planning meeting?	23
Chart 14. If your family member transitioned out of school services during the past year, did s/he have a transition plan?	23
Chart 15. Does your family member have enough supports to work or volunteer in the community?	23
Chart 16. Do you feel prepared to handle the needs of your family member in an emergency such as a medical emergency or a natural disaster?	23

<i>Satisfaction With Services and Supports</i>	<i>51</i>
Chart 46. Overall, are you satisfied with the services and supports your family member currently receives?	53
Chart 47. Do you know how to file a complaint or grievance about provider agencies or staff?	53
Chart 48. If a complaint or grievance was filed or resolved in the past year, are you satisfied with the way it was handled and resolved?	53
Chart 49. Do you know how to report abuse or neglect related to your family member?	53
Chart 50. In the past year, was a report of abuse or neglect filed on behalf of your family member?	54
Chart 51. If a report of abuse or neglect was filed on behalf of family member, did the appropriate people respond to the report?	54
Chart 52. If someone other than you or another family member reported abuse or neglect in the past year on behalf of your family member, were you notified of the report in a timely manner?	54
Chart 53. Do you feel that services and supports have made a positive difference in the life of your family member?	54
Chart 54. Have the services or supports that your family member received during the past year been reduced, suspended, or terminated?	55
Chart 55. If services were reduced in the past year, did the reduction, suspension, or termination of these services or supports affect your family member negatively?	55
Chart 56. Have the services or supports that your family member received been increased in the past year?	55
Chart 57. Are services and supports helping your family member to live a good life?	55
Table 37. Satisfaction With Service and Supports	57
Table 38. Satisfaction With Service and Supports (continued)	57

What is NCI?

The National Core Indicators (NCI) program is a voluntary effort by state developmental disability agencies to track their performance using a standardized set of consumer and family/guardian surveys with nationally validated measures. The effort is coordinated by the National Association of State Directors of Developmental Disabilities Services (NASDDDS) and the Human Services Research Institute (HSRI).

NCI has developed more than 100 standard performance measures (or ‘indicators’) that states use to assess the outcomes of services for individuals and families, including outcomes in the areas of employment, rights, service planning, community inclusion, choice, health, and safety. In 2017-18 a total of 46 states, the District of Columbia and 22 sub-state entities participated in NCI.

What is the NCI Family/Guardian Survey?

The NCI Family/Guardian Survey is used to gather data on family outcomes. It is mailed to families who have an adult family member who lives somewhere other than the family home and receives at least one service other than case management from the state DD agency. The survey collects demographic information on both the individual receiving services and the person who fills out the survey (the ‘respondent’) as well as information on services and supports received. The survey is continually refined and tested to ensure it is valid and reliable.

In 2017-18, a total of 4,890 Family/Guardian Surveys were completed across ten states.¹ The survey contained six groupings of questions (“sub-domains”) that probe specific areas of quality service provision: information and planning, access and delivery of services, choice and control, community connections, satisfaction, and outcomes (see Table A1 on the following page). Respondents also had the option of writing open-ended comments concerning their family’s participation in the service system.

¹ States that conducted the Family/Guardian Survey in 2017-18 were: AZ, FL, GA, MD, NH, NC, PA, SD, UT and WA.

Table A1. NCI Family Survey – Sub-Domains and Concern Statements

Sub-Domain	Concern Statement
Information and Planning	Families/family members with disabilities have the information and support necessary to plan for their services and supports.
Access & Support Delivery	Families/family members with disabilities get the services and supports they need.
Choice, Decision Making & Control	Families/family members with disabilities determine the services and supports they receive and the individuals or agencies who provide them.
Involvement in the Community	Family members with disabilities use integrated community services and participate in everyday community activities.
Satisfaction	Families/family members with disabilities receive adequate and satisfactory supports.
Outcomes	Individual and family supports make a positive difference in the lives of families.

How were people selected to participate?

States were asked to administer the survey to a random sample of at least 1,200 families, all of whom have an adult family member with a developmental disability who lives somewhere other than the family home and receives at least one direct service or support other than service coordination.

Beginning in 2016-17, states had a choice of mailing paper surveys to families selected in their sample, sending a URL link for families to complete surveys online (referred to as “direct entry”), or both. In previous years, states only had the option to mail paper surveys. In 2017-18, a total of three states had at least a portion of surveys completed via direct entry mode.²

All states mailed out a paper survey to families selected in their sample. A sample size of 1,000 was recommended with the expectation of a 40% return rate or greater (yielding 400 or more usable responses per state). However, most states decided to sample more than 1,000 families, expecting a lower response rate than 40%. A final sample size of 400 would guarantee a +/- 5% margin of error and a 95% confidence level when interpreting the results. Both the confidence level and margin of error used are widely accepted standards for reviewing results, regardless of population size. States with fewer than 1,000 potential respondent families were instructed to send surveys to all eligible families. With response rates lower than expected, we included in our national reports those states that submitted fewer than 400 surveys up to a margin of error of no greater than +/- 7%.

² States that used the direct entry or mail and direct entry options were: FL, NC and WA. For more information on response rates and mode, please see the Methodology section within the national edition of the 2017-18 Family/Guardian Survey Report.

Data Analysis

Surveys received from the state were considered valid based on the following two criteria:

1. The respondent indicated the individual with an intellectual or developmental disability receiving services lived somewhere other than the family home.
2. At least a portion of survey questions were answered aside from demographic information.

Questions left blank or marked ‘not applicable’ are not included in analysis. For most questions, ‘don’t know’ responses were excluded from analysis. Two questions in the Satisfaction section combine ‘no’ and ‘don’t know’ responses; those questions are denoted with an asterisk in the table. For all items shown, states receive an ‘n/a’ designation for a survey item if fewer than 20 people responded; however, their data are included in the NCI Average.

Weighting

Prior to 2016-17, the NCI average was calculated as the simple arithmetic mean of all state means (an approach known as “average of averages”). Beginning last year, the approach has been enhanced to take into account the relative numbers of people receiving services through participating states’ systems. The NCI averages contained in this report are “weighted” means. Applying statistical weights allows a state that provides services to a larger number of people (but is represented in the data by a sample of the same size as other states) to have a higher influence on the overall NCI average—that is, the state’s contribution to the NCI average is proportional to its service population. The weights used in calculations for this report were developed using each participating state’s number of survey respondents and its total survey-eligible population.³

³ For more information on weighting and significance testing, see the Methodology section of the National Family/Guardian Survey Report.

Significance testing

Statistical significance is shown in this report. The state's percentage was compared to the weighted NCI average (described above), and the differences between the two were tested for both **statistical significance** as well as **effect sizes**. Effect sizes are used in addition to statistical significance because statistical significance of a state's result depends, in part, on the size of the state's sample: the larger the sample, the more likely it is that even a small difference will be found *statistically* significant.

The t-test analyses established whether the state's percentage was:

1. Higher than the NCI average, and the difference was statistically significant (denoted in the report with an up arrow ▲);
2. Within the average range (i.e., not statistically different from the NCI Average); or
3. Lower than the NCI average, and the difference was statistically significant (denoted in the report with a down arrow ▼).

Statistical significance testing was conducted on each state's "yes" or "always" response compared to the NCI average; statistical significance was determined at the $p \leq .01$ level.⁴ Demographics data and data on services received were not tested for statistically significant differences.

Limitations of the data

The NCI Family/Guardian Survey is a tool for assessing system-wide performance. It is not intended to be used to monitor individuals or providers. The NCI Statewide Average should not be interpreted as defining or providing a benchmark for "acceptable" levels of performance or satisfaction. Instead, it describes average levels of performance or satisfaction across the state; it is up to public managers, policymakers, and other stakeholders to use the data to determine programmatic and policy-related priorities.

⁴ For more information on weighting and significance testing, see the Methodology section of the National Adult Family Survey Report.

What is contained in this report?

This report illustrates the 2017-18 NCI Family/Guardian Survey demographic and outcome results from New Hampshire (NH) compared to the NCI Average. All results are shown first in charts by sub-domain and then in table form by sub-domain. Arrow symbols (▲ and ▼) are used to indicate areas where the state average was statistically higher or lower than the NCI Average. **Please note: items without the ▲ or ▼ arrow symbols indicate that the state was within the NCI Average range.** For most items, the total number of respondents (N) from the state and across NCI states is displayed in charts and tables. States with fewer than 20 responses to a question received an 'n/a' designation; however, their data are included in the NCI Average. All state and national data results for this survey can be found online at <http://www.nationalcoreindicators.org/resources/reports/>.

Family Member

This section provides demographic profiles of the family member about whom the survey was completed.

Information and Planning

Families and family members with disabilities have the information and support necessary to plan for their services and supports.

Charts for Information and Planning

Chart 1. Do you get enough information to take part in planning services for your family member?

Chart 2. Is the information you get about services and supports easy to understand?

Chart 3. Do staff or the residential agency keep you informed about how your family member is doing?

Chart 4. Does the case manager/service coordinator respect your family's choices and opinions?

Chart 5. Respondent's future planning needs

Chart 6. In the past year, did your family member move out of the family home for the first time?

Chart 7. If family member moved out of the home for the first time in the past year, did you have enough choices of service providers to support your family member living outside the family home?

Chart 8. Does your family member have a service plan?

Chart 9. Does the plan include all the services and supports your family member needs?

Chart 10. Does your family member get all of the services listed in the plan?

Chart 11. Did you or another family member (besides your family member with a disability) help make the plan?

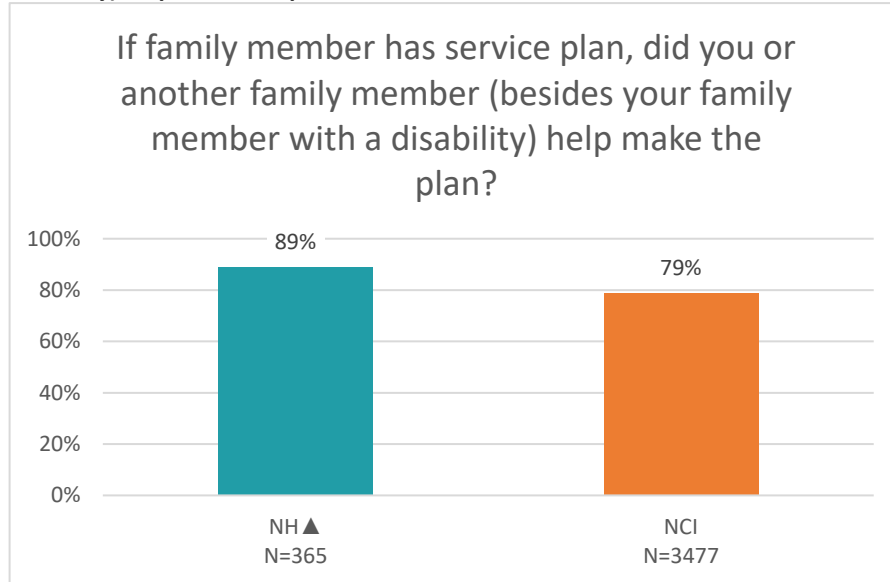

Chart 12. Did your family member help make the plan?

Chart 13. Did you discuss how to handle emergencies at your family member's last service planning meeting?

Chart 14. If your family member transitioned out of school services during the past year, did s/he have a transition plan?

Chart 15. Does your family member have enough supports to work or volunteer in the community?

Chart 16. Do you feel prepared to handle the needs of your family member in an emergency such as a medical emergency or a natural disaster?
